A CHRISTMAS PRESENT.

Last Saturday afternoon at 4:45 the following telegram, which is self explanatory, was received by the Gazette-News:

"Jacksonville, Fla., Nov. 22.—Editor Gazette-News:—The Florida East Coast Railway, in line with its policy to encourage the development of the East Coast, have decided to reduce the passenger rates on its line and branches to three cents per mile, effective December twenty-fifth."

"J. P. Beckwith."

This is indeed a Christmas present to the people of the East Coast of Florida, and one they will all appreciate. It is another example of Mr. Flagler's liberality, coming as it does at the opening of the busy season.

DR. G. MORTON MARCUS.

The famous optician, has returned to Daytona, and can be consulted of the eyes, free of charge, at 8 Beach Street, next to Moore Bros. Eyesight tested free by one of the most renowned and successful as well as reliable opticians in the U. S. Dr. Marcus has the modern appliances for scientific adjustment of glasses to the eye. There is no optician in the United States who enjoys the confidence of the people more than Dr. Marcus. His name is a familiar word throughout this section of country. He has probably adjusted glasses to the eyes of more people of national and international fame than any other optician living.

ANENT THE ELECTRIC ROAD.

Editor Gazette-News:

During the heat of debate personalities are often indulged in which are afterwards regretted. Being to some extent guilty of such remarks at the Council rooms Monday night I wish to say that I have the highest regard personally for the gentleman whose ideas I vigorously opposed. He is an honest and law-abiding citizen, a property owner and, I believe, honest in his endeavors to promote the welfare of the city. His opinions are therefore as worthy of respectful consideration as those of any other respectable citizen.

A franchise for an electric railway was submitted to the Council by Mr. Bond. Capt. Chas. L. Smith and myself were appointed to confer with Mr. Bond because of several objectionable features. We did so and most of the objections were at once removed. The Council believing that other changes should be made, appointed at their last regular meeting the President of the Council and the City Clerk to draft a new franchise, copying to some extent that already granted by DeLand.

This was submitted to a special meeting of the Council Tuesday night. According to its terms the electric railway was granted free right of way from the west side of Daytona to the west side of the Florida East Coast Railway, thence east over one street to the river, thence north or south over Beach street. The chief objection to this was that the street running east and west was not designated. Mr. Smith and myself, in our interview with Mr. Bond, raised that same objection, but were met by the argument that the promoter of the railway would not come here until he knew he could get a franchise. That until he came it could not be determined what street would be selected. That it might be a street at the extreme north or south end of the town. Mr. Bond's personal choice at that time was Orange avenue.

The entire matter has been practically referred back to Mr. Bond.

It seems to me every citizen interested in Daytona must see that such a railroad would be of great benefit to our city. It would provide easy, quick and cheap transportation to and from DeLand and the whole interior; bring many tourists and especially during the summer. Would open up a large area of land now almost useless; bring new settlers, and give us a back country absolutely necessary to the financial solidity of any town. The public is not aware that some of the finest strawberry and vegetable lands in the State can be found west of Daytona. Daytona has grown because of natural advantages. Much work has been done by its citizens, but it is a well known fact that for twenty years every endeavor to improve the town has met with determined resistance on the part of a number of so-called "conservative" men.

It was only after a determined fight that shell was first laid on our streets. There was opposition to grading Beach street, when in some parts the water often stood even at low tide. Opposition to the bridges, railroad, electric lights, to public schools, to anything which, it seems to me, any business man ought to realize meant a more prosperous and larger town. It is not strange there should be opposition to our electric railway. Those who oppose because they honestly believe it will injure the town, cheapen property, prevent its growth are entitled to their opinion, but

if honest in their ideas, are certainly behind the times. The opinions of those who oppose anything necessary to the growth and development of our city purely from selfish motives are not worthy of consideration, nor will they carry any weight with the voter.

There are those who oppose any improvement because they desire to live in a quiet little town in the woods. If they have invested here because they believe this town will remain such they have made a mistake. There are many beautiful spots in Florida far from civilization where such people can live contented. The great majority of people desire a progressive place with the comforts of modern civilization. We who live here, who make our living here, who have worked and seen our labor already bear fruit, know that we must keep pace with the other great rival resorts south of us, who are already taking the bulk of the tourist business.

DeLand has often set us an example of what can be done without natural advantages by a united effort. With a magnificent university, good roads, city water, well equipped fire company, fine graded school building, large cassava factory, public park, golf links, it always knows a good thing when it sees it. Their franchise grants, as might be expected to this railway, free right over ANY and ALL streets.

From the standpoint of the citizen, property owner and the majority of the tourists, I believe we should embrace the present opportunity and go more than half way to secure this railway. Should we not do so the railway will not be forced upon us. If we do not secure it, it means the loss of thousands of dollars in trade. Where one tourist will remain away on account of it, twenty will come because of it.

Every man interested in the development of Daytona should heartily favor it and work for it.

JOHN B. PARKINSON.

HOLLY HILL HAPPENINGS.

Some ghostly visitors went to four of the houses in Holly Hill on Thanksgiving night, but who or what they were must remain a mystery.

On Monday Mr. and Mrs. Crates and family moved nearer to Daytona, and are now occupying part of the house belonging to Mr. Stewart.

Messrs. Heath & Dickinson brought their new launch, the "Cherokee," to Daytona on Wednesday, to have her engines installed. She will soon be ready for her daily trips up or down the river.

Oris, the youngest son of Mr. Bunnell, fell from the dock with about four feet of water on Thursday, and but for the timely assistance of two gentlemen who happened to be passing, the little fellow would have drowned, as he had been under two feet when they rescued him.

Miss Hilda Mann and Miss Rogers, of Turin, are spending a few days with Mrs. Mann, and arrived just in time to enjoy the birthday party given in honor of Miss J. L. Mann's natal anniversary (we must not say which). The Holly Hill friends all enjoyed a lively game of progressive euchre. Mr. Dickinson being the fortunate winner of the first prize, the "sweet consolation," two sticks of candy, being the portion of one other guest whose card remained blank during the entire evening.
